**Terra Nova: The New World After Oil, Cars, and Suburbs** Eric W. Sanderson

Many experts agree that energy is the defining issue of this century. Economic recessions, foreign wars, and foreclosures are only a few of the results of America's dependence on oil. In *Terra Nova*, ecologist Eric Sanderson elucidates the interconnections between oil and money, cars and transportation, and suburbs and land use. He then charts a path toward renewed economic growth, enhanced national security, revitalized communities, and a sustainable environment: a new form of the American Dream. Taking a uniquely cross-disciplinary, accessible approach, Sanderson delves into natural history, architecture, chemistry, and politics, to show how the American relationship to nature shaped our past and predicates our future. Illustrated throughout with maps, charts, and infographics, the book suggests how we achieve a better world through a self-reinforcing cycle of tax reform, retrofitted towns and cities, bicycles and streetcars, and investment in renewable energy.
