3D Angiographic Atlas of Neurovascular Anatomy and Pathology Neil M. Borden

The 3D Angiographic Atlas of Neurovascular Anatomy and Pathology is the first atlas to present neurovascular information and images based on catheter 3D rotational angiographic studies. The images in this book are the culmination of work done by Neil M. Borden over several years using one of the first 3D neurovascular angiographic suites in the United States. With the aid of this revolutionary technology, Dr Borden has performed numerous diagnostic neurovascular angiographic studies as well as endovascular neurosurgical procedures. The spectacular 3D images he obtained are extensively labeled and juxtaposed with conventional 2D angiograms for orientation and comparison. Anatomical color drawings and concise descriptions of the major intracranial vascular territories further enhance understanding of the complex cerebral vasculature.
