This is a new type of book. It's a visual book with 7 videos.

I have learned photography and retouching with the use of tutorials and find that this is a very powerful method of teaching.

We are going to explore how to do photo retouching and make panoramas with Photoshop CS6. We are going to cover key points such as:

Camera Raw Basics.

What retouching actions needs to be done on the raw files for under exposed photos.

The workflow when a human being is in the photo.

How to make panoramas.

Blending several exposures using Photoshop instead of using an HDR software

While teaching I try to follow two rules:

1. No technical terms explained with technical words, but with simple English.
2. No theory, practical and visual examples only.

It was Steve Jobs Idea to include visuals contents on education's materials for books on the iPad, and I think this will be a revolution.

I love to create and share technics, and I hope this Photoshop CS6 Retouching Photos visual book will help you improve your retouching skills and help create astounding photography!
