## **Going Green with the International Residential Code (Go Green with Renewable Energy Resources)**

Scott Caufield

Finally, a resource that bridges the gap between the worlds of green building and residential building codes - Going Green with the International Residential Code. The first book of its kind on the market, this indispensable "code-consultant" takes green building concepts one step further and addresses them as they specifically relate to building codes, and in particular, how they relate to the International Residential Code (IRC). Because the code books themselves do not directly address green construction issues, this book will help the reader make green decisions about construction methods and materials while staying code compliant. Coverage begins with a Building Code Primer that explores basic permitting and regulatory processes. This fundamental knowledge sets the stage for readers to be better able to successfully incorporate green principles into construction projects and avoid costly mistakes that can occur when key processes are not established and followed beforehand. The book then moves to a review of the IRC, chapter-by-chapter, identifying areas where provisions of the code will affect a green construction project and where in a project there are green options, as well. Using tried-and-true real-life examples of green construction techniques throughout, this is the perfect guide to understanding building codes in today's quest to go green. Check out our app, DEWALT Mobile Pro™. This free app is a construction calculator with integrated reference materials and access to hundreds of additional calculations as add-ons. ### **From reader reviews:**

#### **Robert Penrose:**

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The information you get based on what kind of e-book you read, if you want attract knowledge just go with knowledge books but if you want really feel happy read one using theme for entertaining for instance comic or novel. Often the Going Green with the International Residential Code (Go Green with Renewable Energy Resources) is kind of publication which is giving the reader erratic experience.

#### **Melvin Groth:**

The reason why? Because this Going Green with the International Residential Code (Go Green with Renewable Energy Resources) is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will distress you with the secret this inside. Reading this book next to it was fantastic author who have write the book in such remarkable way makes the content inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this nowadays or you going to regret it. This book will give you a lot of rewards than the other book have got such as help improving your talent and your critical thinking way. So , still want to postpone having that book? If I have been you I will go to the e-book store hurriedly.

#### **Jennifer Yost:**

Do you like reading a book? Confuse to looking for your preferred book? Or your book was rare? Why so many concern for the book? But just about any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but also novel and Going Green with the International Residential Code (Go Green with Renewable Energy Resources) or perhaps others sources were given information for you. After you know how the truly great a book, you feel want to read more and more. Science reserve was created for teacher or maybe students especially. Those publications are helping them to add their knowledge. In other case, beside science book, any other book likes Going Green with the International Residential Code (Go Green with Renewable Energy Resources) to make your spare time more colorful. Many types of book like this.

#### **Many Shirley:**

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's internal or real their hobby. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for

yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Going Green with the International Residential Code (Go Green with Renewable Energy Resources) can make you really feel more interested to read.
