*Office-Based Rhinology* conveys the principles and techniques necessary for successfully undertaking various rhinology procedures in the office setting. The procedures described will range from those commonly performed in the physician's office (e.g. nasal endoscopy and debridement) to certain procedures often performed in the operating room for which, in certain patients, an office setting would be appropriate (e.g. nasal polypectomy and drainage of mucoceles). It also covers relevant sinonasal anatomy and radiology, proper patient selection, and appropriate room setup. Its straightforward approach makes it an easy to use reference, a must-have for practicing otolaryngologists and senior level residents.

The book comes with a DVD which includes 28 surgical videos.
