Large-Scale Data Analytics

Large-Scale Data Analytics

Large-Scale Data Analytics

This edited book collects state-of-the-art research related to large-scale data analytics that has been accomplished over the last few years. This is among the first books devoted to this important area based on contributions from diverse scientific areas such as databases, data mining, supercomputing, hardware architecture, data visualization, statistics, and privacy.

There is increasing need for new approaches and technologies that can analyze and synthesize very large amounts of data, in the order of petabytes, that are generated by massively distributed data sources. This requires new distributed architectures for data analysis. Additionally, the heterogeneity of such sources imposes significant challenges for the efficient analysis of the data under numerous constraints, including consistent data integration, data homogenization and scaling, privacy and security preservation. The authors also broaden reader understanding of emerging real-world applications in domains such as customer behavior modeling, graph mining, telecommunications, cyber-security, and social network analysis, all of which impose extra requirements for large-scale data analysis.

Large-Scale Data Analytics is organized in 8 chapters, each providing a survey of an important direction of large-scale data analytics or individual results of the emerging research in the field. The book presents key recent research that will help shape the future of large-scale data analytics, leading the way to the design of new approaches and technologies that can analyze and synthesize very large amounts of heterogeneous data. Students, researchers, professionals and practitioners will find this book an authoritative and comprehensive resource.

From reader reviews:

Maria Jennings:

This book untitled Large-Scale Data Analytics to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail outlet or you can order it by means of online. The publisher of the book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Mobile phone. So there is no reason to you personally to past this e-book from your list.

Patrick Walker:

Are you kind of active person, only have 10 or perhaps 15 minute in your time to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book than can satisfy your short space of time to read it because all this time you only find e-book that need more time to be study. Large-Scale Data Analytics can be your answer because it can be read by you who have those short free time problems.

Thomas Stewart:

Reading a book being new life style in this calendar year; every people loves to study a book. When you examine a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you need to get information about your review, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, in addition to soon. The Large-Scale Data Analytics will give you a new experience in examining a book.

Sheila Seim:

A number of people said that they feel bored when they reading a e-book. They are directly felt this when they get a half parts of the book. You can choose the particular book Large-Scale Data Analytics to make your personal reading is interesting. Your own skill of reading ability is developing when you just like reading. Try to choose very simple book to make you enjoy to study it and mingle the feeling about book and reading especially. It is to be initial opinion for you to like to available a book and learn it. Beside that the e-book Large-Scale Data Analytics can to be your new friend when you're feel alone and confuse in what must you're doing of their time.
