The U.S. Constitution is designed to distribute power in order to prevent its concentration, and in particular, it draws clear lines between the responsibilities of the military and those of civilian law enforcement. But the new global threat paradigm, requiring responses both abroad and at home, calls out for military and civilian intelligence gathering to work in tandem. *The Civil-Military Divide: Obstacles to the Integration of Intelligence in the United States* looks at historic and legal ramifications of such efforts.

Louise Stanton's thought-provoking work sums up the current state of U.S. intelligence gathering at all levels of government. It then looks at the range of recommendations for overhauling our intelligence efforts in the context of the U.S. Constitution to assess what may or may not be constitutionally supportable. At issue are three long-established, often reaffirmed principles: the separation of powers, the federalist system that gives the U.S. government precedence over states, and the separation of the civilian and military sectors.
